Strong background in Agile practices, Git workflows, and modern web architecture.

RELEVANT EXPERIENCE

Match-Trade Technologies

Angular Front-End Developer — Type: **Hybrid (4 days office)**

City: **Poznań** — Date: **March 2024 - Present**

- Moved state management to modern Angular: Signals, NgRx SignalStore, standalone components and zoneless OnPush change detection, with RxJS for real-time streams.
- Built screens for the internal Platform Config admin app, including admin management, redirect links, broker switching and guest-mode configuration.
- Developed new product features end to end on a live web trading platform, including the Partner Room module, news and calendar module, login and registration.
- Rebuilt 20+ shared UI components into a company-wide design system.
- Enhanced code quality and prevented regressions by implementing isolated unit and component tests in Vitest with typed store mocks, securing critical workflows during rapid feature delivery.
